PROJECTS

- **Face Recognition Attendance System**: Developed an advanced face recognition attendance system using Python and specialized libraries. Utilized deep learning algorithms to ensure precise and reliable attendance recording with accurate timestamps. Implemented a streamlined process where images captured during attendance check are matched against a database of images for accurate identification. Designed the system to automatically update an Excel spreadsheet with real-time attendance records, linking each attendance instance to the respective individual's name and timestamp.Github
- **Portfolio Website**: Designed and developed a personal portfolio website showcasing projects and skills.Try it!
